

Official Red Dust Rebellion FAQ and Clarifications

Updated 05/15/2025

Using this Document

This document is intended as a comprehensive list of all clarifications, questions, and errata players have encountered while playing *Red Dust Rebellion*. For ease of reference, any errata are listed in their own section at the top of this document, while clarifications and questions are listed below.

Errata

- **Rulebook, p.21, Faction Order:** The second sentence in this section should read "The leftmost eligible Faction is the 1st Eligible, and the next leftmost is the 2nd Eligible."
- **Rulebook, p.34, Transport:** The final sentence of the Transport procedure should read "Move any number of your Troops among the selected spaces" (Transport can only move EG Troops if MG is the EG Controller).
- **Playbook Tutorial, p.19:** The MarsGov Assault (top left paragraph) should have cost one additional Resource due to the GENERAL STRIKE Campaign card that was played by RD on the previous turn. This has no effect on the rest of the Tutorial, but MG should be on 0 Resources in the final map diagram.
- **Playbook Tutorial, p.19:** The diagram should not have a Raging Storm in New Córdoba. No effect on the rest of the Tutorial.
- **Playbook Tutorial, p.20:** The diagram should show three CR Bases on map, not four. No effect on the rest of the Tutorial.
- **Playbook Tutorial, p.20, Redeploy Phase:** The EarthGov Controller must redeploy EarthGov Troops to Phobos or spaces with MarsGov Bases, not EarthGov Bases (which don't exist). This has no effect on the rest of the Tutorial.
- **Playbook Tutorial, p.22:** The final board diagram should have three CR Rebels in Daedalia Planum, rather than one CR Rebel and one CR Base. The CR score marker should therefore be on 7 rather than 8.
- **Game Board:** On the Sequence of Play track, the "1st Faction Op May Add Special Activity" box should read "1st Faction Op **and** Special Activity".
- **MarsGov player mat, reverse (setup) side:** "Shenzou" should be spelled "Shenzhou".
- **Player Aid foldout, MarsGov page:** The procedure for Transport should say "Move any number of your Troops between selected spaces".
- **Curiosity Non-Player Cards:** Six of the Non-Player cards have essentially the same minor error:
 - The boxes reading "2d6 ≤ Available RD Rebels?" on NP RD cards **N**, **P**, and **T** should read "2d6 ≤ Available RD forces?".

- The boxes reading “**2d6 ≤ Available CR Rebels?**” on NP CR cards **U**, **V**, and **ZZ** should read “**2d6 ≤ Available CR forces?**”.

This error can be easily corrected by either writing in the correct word or just keeping it in mind during play. Even if not corrected it will only have a very minor impact on NP RD and NP CR performance, probably not even noticeable over the course of a single game. (Note that NP CR card W does correctly check for “1d6 ≤ Available CR Rebels?”; in this case no adjustment is necessary.)

The Non-Player Example of Play does assume the corrected wording on these cards, but it doesn't not have a significant effect on the Example of Play.

- **Curiosity Non-Player Cards:** The top box on card JJ should say "reachable by CORP units?".
- **Curiosity Non-Player Cards:** The Special Activity boxes on cards YY, Z, and ZZ should not contain the text "(unless already selected)". This has no game effect and the text can just be ignored.
- **Non-Player Example of Play, p.29:** “Tharsis” in the first point in the left column should be “Tharsis Tholus”. This has no further impact on the example of play.
- **Non-Player Event Instructions:** The NP CR instructions for Event #30 should read “Select spaces at Passive Support first, then Active Support, then use **Place Bases**”.

Clarifications

- **Options for 2nd Eligible:** If CR is 1st Eligible and uses an Asset Event (from their hand) then the 2nd Eligible Faction will have the same options that they would have if the regular Event had been played (Operation in one or more spaces, with a Special Activity if desired).
- **Suppress:** The EarthGov Controller may only Suppress if they are the Faction currently executing an Assault Operation. Rebels displaced by Suppress may be moved to any adjacent Deserts, even with Raging Storms.
- **Free Ambush by Event:** If RD or CR use an Event that allows them to perform a "free Ambush", this includes a free Attack in the spaces selected for Ambush (which is then modified by Ambush as usual).
- **Playbook Tutorial, p.18:** The Reclaimer Purify Special Activity (top left paragraph) could normally have also targeted Trouvelot, which has Reclaimer Control, but there is a Raging Storm there so it is not an eligible target for Special Activities (or Operations).
